PSI Webinar: Innovative approaches in the development of pediatric medicines

Date: 08-Dec-2020

Time: 1:00 pm – 3:00 UK time

Click [here](#) to Register

Agenda and other details

Date: Tuesday 8th December 2020

Time: 13:00 - 15:00 GMT

Speakers: Andrew Thomson (*EMA*), Ros Walley (*UCB*), Aurelie Gautier (*Novartis*), Juan Abellan (*GSK*), and Robert Nelson (Johnson & Johnson).

Who is this event intended for? Statisticians involved in the development of pediatric medicines in all therapeutic areas, from industry, CROs and academia.

What is the benefit of attending? The audience will gain insight into the challenges of pediatric drug development and how to address them.

Registration

You can now register for this event. Registration will close at 12:00 on 7th December 2020.

PSI Members: Free to attend

Non Members: £20+VAT

To register your place, please [click here](#).

Overview

Children are considered a vulnerable population. Correspondingly, developing drugs for pediatrics is associated with a range of challenges including but not limited to ethical and methodological challenges. In this PSI webinar, representatives from different pharmaceutical companies will present innovative approaches that address the challenges of developing pediatric medicines. This includes the use of historical data, Bayesian methodology, and partial and full extrapolation approaches. The presentations are followed by a discussion of the topic from a clinical perspective and Q&A.
